How to set alerts for our custom indicators on Ninjatrader:

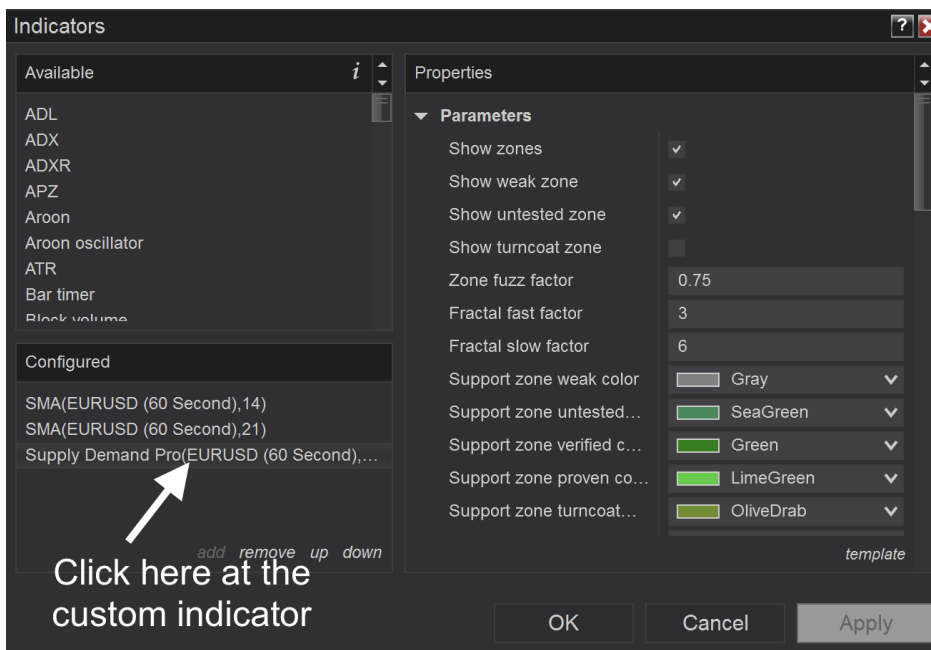

Please watch this video: <https://youtu.be/eXDya550D7A>

Or, please follow the instructions below:

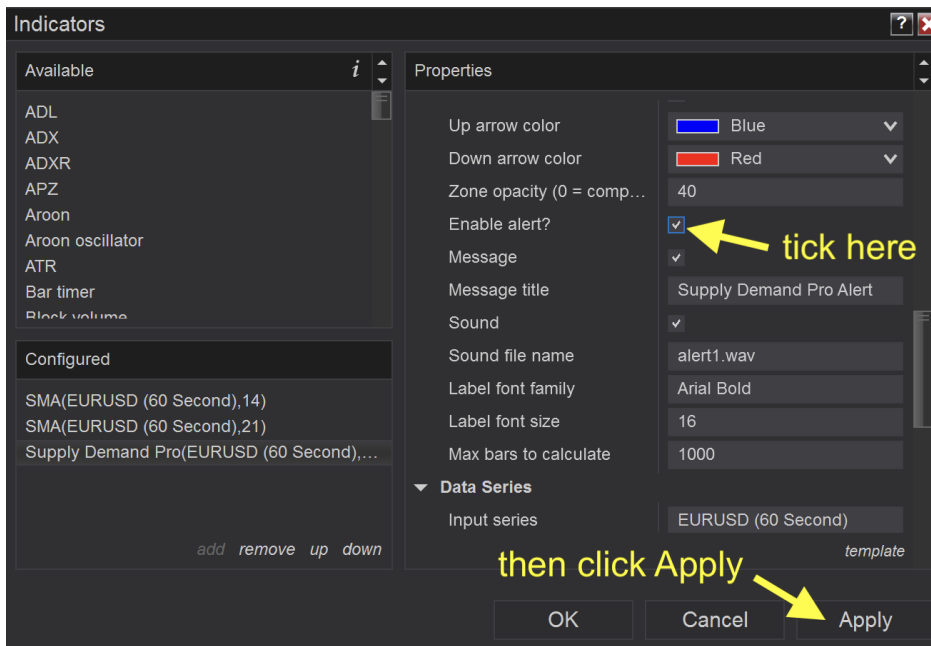

- Step 1: At the “Chart” window, click on “Indicators” icon

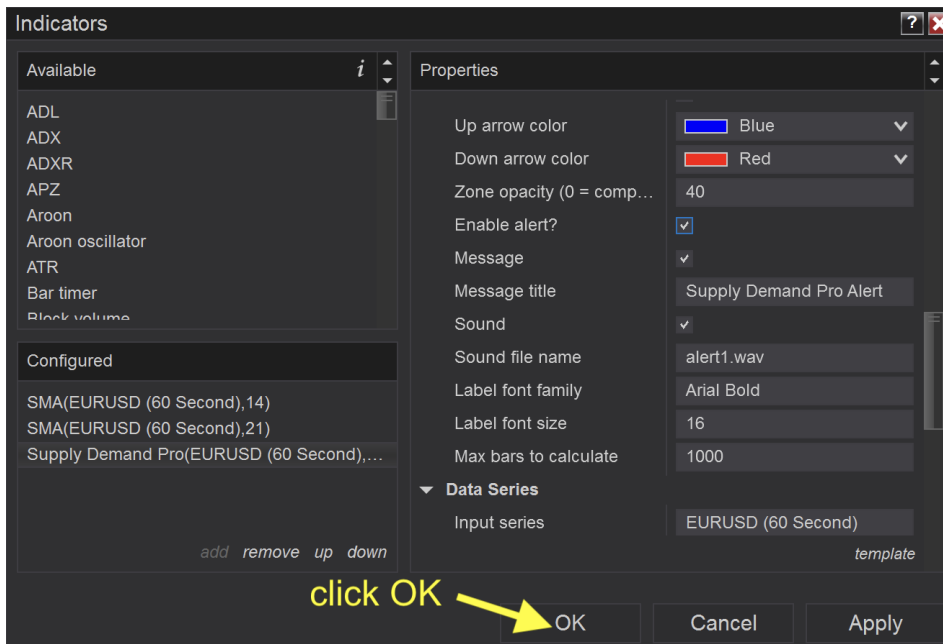

- Step 2: after the “Indicators” window pops up, you select the custom indicator you want to set alerts. In this case, we use “Supply Demand Pro” indicator as an example

- Step 3: on the same “Indicators” window, you scroll down the Properties panel on the right hand side, and tick at “Enable alert?”. Then, click Apply

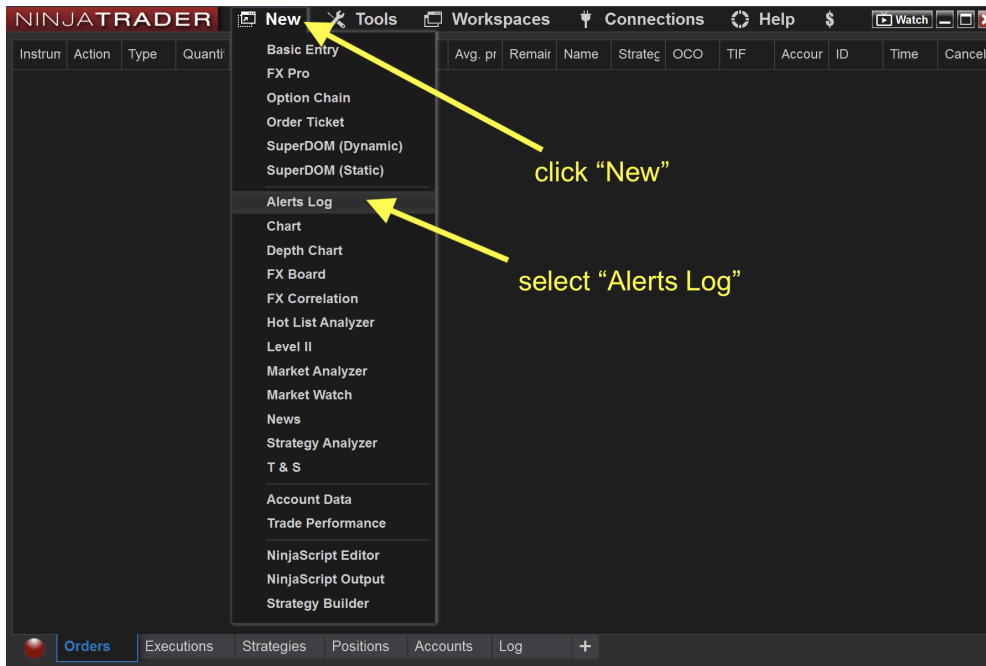

- Step 4: Then, you click OK to save the setting

- Step 5: You will hear a sound alert whenever there is a trade setup identified by the custom indicator. Unlike MT4 or TradingView platforms, the alert message of Ninjatrade

does not have a popup window. It will show the message at the “Alerts Log” window. To access the “Alerts Log” window, you go to the Ninjatrader menu, click “New”, and select “Alerts Log”

- Step 6: Here is the “Alerts Log” window.
